SUMMARY

Full Stack Web Developer and IT Specialist with 7+ years of professional experience in web application development, custom software, IT support, system administration, networking, and technical infrastructure. Strong hands-on experience with PHP, Laravel, JavaScript, React.js, Vue.js, Node.js, MySQL, SQL, RESTful APIs, HTML5, CSS3, and Tailwind CSS. Experienced in developing business applications, registration systems, dashboards, QR-based applications, interactive event systems, and real-time monitoring solutions. Also experienced in Windows Server, VMware, networking, hardware troubleshooting, CCTV, biometric systems, Microsoft 365, and IT infrastructure support.

EDUCATION

World Citi Colleges

Bachelor's Degree in Information Technology

2012–2016

EXPERIENCE

FULL STACK WEB DEVELOPER / IT SPECIALIST

2019–2026

Wildfire Inc.

Philippines

WEB DEVELOPMENT; IT SUPPORT AND INFRASTRUCTURE

- Designed, developed, deployed, and maintained full-stack web applications for corporate clients, marketing activations, events, and internal business operations.
- Developed responsive applications using PHP, JavaScript, HTML5, CSS3, SQL, and RESTful APIs.
- Built backend applications using PHP and Laravel with MySQL databases.
- Designed and optimized databases for performance, reliability, and scalability.
- Developed RESTful APIs and integrated third-party services and external systems.
- Built admin dashboards, reporting systems, monitoring tools, and data management interfaces.
- Implemented QR code generation, QR scanning, barcode scanning, authentication, and registration workflows.
- Developed online registration and RSVP systems with attendee management, check-in, notifications, reporting, and administrative controls.
- Developed browser-based interactive games with scoring, timers, leaderboards, animations, and reward systems.
- Integrated web applications with hardware devices, sensors, scanners, touch displays, and event technology.
- Performed application testing, debugging, deployment, maintenance, and performance improvements.
- Supported production systems and resolved technical issues during live events.
- Collaborated with project managers, designers, developers, and event teams to deliver solutions under tight deadlines.
- Provided technical support for employees by diagnosing and resolving hardware, software, network, and system issues.
- Installed, configured, maintained, and troubleshooted Windows desktops and laptops.
- Managed Windows Server environments, user accounts, shared folders, and network resources.
- Supported Active Directory and Microsoft 365 / Office 365 environments.
- Configured and maintained VMware virtual machines and virtualization environments.
- Installed and maintained LAN/WAN infrastructure, routers, switches, and wireless networks.
- Performed network troubleshooting involving TCP/IP, DNS, DHCP, and Wi-Fi.
- Installed, configured, maintained, and troubleshooted CCTV surveillance systems, including DVR/NVR equipment.
- Installed and maintained biometric attendance systems and resolved synchronization issues.

- Supported endpoint security, antivirus, backup, and recovery procedures.
- Maintained IT inventory, technical documentation, and equipment records.
- Coordinated with third-party vendors for hardware repairs, equipment replacement, and system upgrades.
- Performed preventive maintenance to improve system reliability and reduce operational downtime.

FREELANCE FULL STACK WEB DEVELOPER

2024–Present

- Designed and developed custom web applications, interactive event systems, and digital marketing activations for corporate clients and agencies.
- Delivered end-to-end solutions covering requirements analysis, UI/UX, development, testing, deployment, and technical support.
- Developed custom business systems, registration platforms, queuing systems, interactive games, dashboards, and promotional applications.
- Integrated APIs, databases, QR systems, authentication, reporting tools, and interactive technologies.
- Provided onsite technical support and production assistance for live events.

PROJECTS

CORPORATE REGISTRATION PLATFORMS | PAPP | Abbott | Nestlé

- Developed end-to-end online registration systems for corporate events.
- Implemented registration, QR code generation, attendee check-in, email notifications, reporting dashboards, and administrator management.
- Built data-driven workflows supporting event operations.

RANDOMIZER AND DIGITAL RAFFLE SYSTEMS

- Developed secure random winner-selection platforms for corporate promotions and live events.
- Implemented eligibility validation, administrative controls, prize management, and audit logging.

INTERACTIVE EXPO GAMES

- Developed browser-based interactive games for trade shows and corporate activations.
- Implemented scoring, timers, leaderboards, animations, and prize redemption workflows.

MITSUBISHI AND JETOUR QUEUING MANAGEMENT SYSTEM

- Developed a digital queuing management system with customer registration, queue management, operator dashboard, and real-time queue monitoring.

NESTLÉ SCRATCH GAME

- Developed an interactive digital scratch game with prize validation, redemption workflow, and administrator controls.

ALASKA CATCHING GAME

- Developed an interactive catching game with scoring, timers, animations, and reward mechanics.

HSBC ZODIAC INTERACTIVE EXPERIENCE

- Developed an interactive Zodiac experience with dynamic animations, personalized results, and promotional engagement features.

TECHNICAL SKILLS

Full Stack Web Development

PHP and Laravel Development

JavaScript Development

React.js and Vue.js

Node.js and Express.js

RESTful API Development and Integration

MySQL and SQL Database Development

Database Optimization

Responsive Web Development
Admin Dashboard Development
QR Code and Barcode Systems
User Authentication
Real-Time Applications
IT Technical Support
Hardware and Software Troubleshooting
Network Administration
Windows Server Administration
Active Directory
VMware Virtualization
Microsoft 365 / Office 365
CCTV and Biometric Systems
System Deployment and Maintenance
Production Support
Technical Documentation
Git and Jira
Agile Development
